### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 3. A method for providing a customer computer with access, through a network, to a media content file, said method comprising the steps of:

- opening a session with the customer computer;
- receiving from the customer computer a request to view a media content file;
- creating a temporary metafile having a temporary metafile name, said metafile containing a network address where said media content file can be found, an unencrypted file path leading to said media content file, and an encrypted name of said media content file;
- sending to the customer computer the temporary metafile name;
- ~~canceled or deleting the metafile before or at the end of said session with the customer computer; and~~
- said customer computer requesting said temporary metafile to learn the encrypted media content file name, unencrypted media content file path and said network address, and

Art Unit: 2146

said customer computer subsequently sending said encrypted media content file name and said unencrypted media content file path to said network address; and

canceling or deleting the metafile before or at the end of said session with the customer computer.

5. A method for providing a customer computer with access, through a network, to a media content file, said method comprising the steps of:

opening a session with the customer computer with an application server;

receiving from the customer computer a request to view a media content file;

creating a temporary metafile having a temporary metafile name, computing said metafile name based on characteristics of said customer session, said metafile containing a network address where said media content file can be found and an unencrypted file path leading to said media content file;

sending to the customer computer the temporary metafile name;

~~canceling or deleting the metafile before or at the end of said session with the customer computer; and~~

the customer computer:

receiving said temporary metafile name;

using said temporary metafile name, requesting the temporary metafile from said application server;

sending a request to said network address to receive and play said media content file identified by said encrypted media content file name and an unencrypted media content file path; and

receiving and playing the named media content file from said network address

canceling or deleting the metafile before or at the end of said session with the customer computer.

2. The canceling or deleting step of claims 3 and 5 has been moved to the end of the claims. Canceled claim 1 included this step as the final step, and it is believed Applicant intended for it to be the final step in the amended claims 3 and 5. Otherwise, 112, second paragraph issues would be raised by having actions occur related to the metafile following the canceling or deleting of the metafile.

3. A comma and the word "found" have been added to claim 5 (both believed to be unintentionally omitted by Applicant, as the limitation is grammatically incorrect without the comma and the word "found" appears similarly in claim 3).

4. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest the subject matter of claims 3 or 5.

Specifically, the prior art fails to teach or suggest the following text of claim 3, when considered in light of the remaining text of claim 3: "said customer computer requesting said temporary metafile to learn the encrypted media content file name, unencrypted media content file path and said network address, and said customer computer subsequently sending said encrypted media content file name and said unencrypted media content file path to said network address".

Additionally, the prior art fails to teach or suggest the following of claim 5, when considered in light of the remaining text of claim 5: "the customer computer:

receiving said temporary metafile name;

using said temporary metafile name, requesting the temporary metafile from said application server;

sending a request to said network address to receive and play said media content file identified by said encrypted media content file name and an unencrypted media content file path; and

receiving and playing the named media content file from said network address".

Furthermore, Applicant's remarks and arguments given in the appeal brief filed 4/16/08 for claims 1-3 (pages 9-16) and claims 1-2 and 5 (pages 9-14 and 16-17) are persuasive. The subject matter of claims 1-2 were amended into both claims 3 and 5, which is why the remarks and arguments for claims 1-2 are relevant to the reasons for allowance of claims 3 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian P. Whipple whose telephone number is (571)270-1244. The examiner can normally be reached on Mon-Fri (9:30 AM to 6:00 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on (571) 272-3913. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
